- Debugging
- Event bubbling
- Callback function
- Date
- Form
- Error types
- BOM

Problem1

- Photo gallery with Next, Previous and Slideshow.
- Next goes to next pic and stops when reaching last image (Done)
- Previous goes back to previous image and stops when reaching first image (Done)
- Slideshow will circulate, i.e. when reach last image is should continue displaying staring from first image
- Stop will stop slideshow behavior.
- Let the delay between every to image lasts 2 seconds

Problem2

Create an animation on the page that makes an orange marble move to the next location in the line every second. Allow the user to stop the animation by placing the cursor on any marble. The animation will restart again once the user remove the cursor from that marble. Add your own interesting feature to the script that tinkers with the speed or location of images

Problem3

Create a JavaScript e-commerce project form for adding products, including fields for the product name, image, and amount. When a user clicks 'Add',

the product should be added to the list after 2 seconds

Problem4

create a simple Js project that display's:

today's date

current time
